

Dear Freund,

As you are aware, FIGO is fully engaged in the organization of the World Congress that will be held in Rio de Janeiro, Brazil, in October of 2018. The FIGO Congress is the only obstetrics and gynecology related event that approaches all the aspects of women's health worldwide and stands today as the practice and scientific benchmark for this specialty.

It will not come as a surprise to you that the Scientific Committee is working non-stop in the design of a high-quality program for the more than 8,000 participants we hope to welcome to the Congress. The programme features ground-breaking daily practice subjects, the most recent progresses in the development and management of medical practice requirements, as well as the critical challenges faced by low-income countries, but not overlooking the research-related aspects in all areas of our comprehensive specialty.

An event of such magnitude requires significant efforts from many people, who, with their vision and solidarity, are the true architects of the organization and design of this major scientific, practical, and social gathering. Our goal is to make the largest number of professionals in Latin America aware of the opportunities provided by this Congress, and to offer them in its scientific and social program everything they might be interested in aiming at their professional development and learning to be able to provide improved quality care to Latin American women. This is why we are asking your assistance to promote FIGO World Congress and provide as much information as possible to the members of your society.

With the purpose of making you aware of the most important of Congress dates, it is my pleasure to announce that until March 5 all the specialists who wish to register will still have the option to do it at a discount fee (US\$ 795.00). On the other hand, the nations listed by the World Bank as low-income countries will also be able to register at an even lower fee (US\$ 375.00).

Also, the physicians and specialists who wish to present papers will be able to submit it until March 15, 2018. To be included in the program, all the accepted papers authors must register for the Congress before May 15.

The papers, posters or presentations may be submitted through the Congress website at www.figo2018.org.

On behalf of the Organizing Committee of FIGO 2018, we would like to thank you in advance for your support and assistance. For additional information, please do not hesitate to contact us by sending an email to adriana.rodriques@mci-group.com

Best Regards,

Prof. Luis Cabero Roura
Organizing Committee Chair

Dr. Carlos Futchner
Elected President of FIGO
